Catalogue of the Polish Clinical Trials Network

Catalogue of the Polish Clinical Trials Network (PSBK) is a source of information on the centers associated with the Network. The document contains the most important data on individual entities, including the availability of research equipment, description of infrastructure, level of experience in the implementation of clinical trials, brief biographies of key investigators as well as certificates and accreditations obtained. The main purpose of creating the Catalogue was to make it easier for researchers and institutions to use PSBK resources and to create a comprehensive promotional and marketing tool for PSBK, ultimately to be used at industry events.

In addition to direct contact information, the Catalogue includes information on the Medical Research Agency's recently established initiative, the Sponsor Support Center (CWS), i.e. a structure responsible for supporting clinical trial sponsors in the process of identifying and selecting suitable sites for clinical trials. With the ever-increasing number of entities engaging in CWS activities, it was deemed necessary to create a single point of contact to coordinate the establishment of cooperation.
